Étrangleurs TRULOCK Chokes

Titanium

Fabriqués à partir d'un alliage en titane de très haute qualité et sont environ 35% plus légers qu'une fabrication en acier. Chaque étrangleur est de couleurs différentes afin de faciliter l'identification. La grandeur et le diamètre sont aussi identifiés. La surface intérieure est ultra lisse afin de procurer une meilleure stabilité. Ces modèles sont parfaits pour les fusils de tir aux pigeons d'agile avec de longs canons.

Precision Hunter

Allongés avec une extrémité quadrillée pour une meilleure prise et ont un fini noir anodisé. Fabriqués en acier inoxydable 17-4. La grandeur et le diamètre de chaque chokes sont bien identifiés sur chacun. Ce style est un excellent choix pour les tireurs qui veulent utiliser un seul modèle soit au champ de tir ou pour la chasse.

Sporting Clay

Allongés avec une extrémité quadrillée pour une meilleure prise et ont un fini brillant en acier inoxydable. Dotés d'un intérieur ultra lisse et sont parfaits pour le skeet, la trappe ou le Sporting. Fabriqués en acier inoxydable 17-4 PH. Le diamètre et la taille sont inscrits sur chaque chokes.

La garantie à vie de Trulock Chokes

Si vous n'êtes pas satisfaits dans les 60 jours suivants la date d'achat, vous n'avez qu'à nous retourner le produit pour échange ou remboursement. La facture d'achat doit être incluse dans le colis de retour.

Titanium Chokes

Made from high strength titanium alloy. Made from this material will weigh approximately 35 % lighter than the same choke made from steel. Extended, knurled and each choke has a unique colour, which makes them very easy to identify. Heads are marked with the degree of choke and the body is marked with the exit diameter in thousandths of an inch. Ultra smooth interior for excellent pattern control. Perfect for those long barrelled sporting clays guns.

Precision Hunter Chokes

Extended, knurled, and have a black oxide finish. Normally pattern better than flush mount chokes due to less shot deformation. Manufactured from high strength 17-4 stainless steel. All Precision Hunter chokes are marked on the head with the degree of choke and on the body with the bore diameter. Excellent choice for the shooter who wants one choke for both the field and range shooting.

Sporting Clays Chokes

Extended, knurled, and have a bright stainless finish. Normally pattern better than flush due to less shot deformation. Extremely smooth interior finish and perfect choice for skeet, trap or sporting clays. Manufactures from high strength 17-4 PH stainless steel. All Sporting Clays chokes are marked on the head with the degree of choke and on the body with the bore diameter.

Trulock's Guarantee Lifetime Warranty on all chokes

If for any reason you are not satisfied with our products within sixty days from the date of purchase it can be returned to us for exchange or refund. A copy of the sales invoice must be included in the return.
